THE WEEDS DON'T HAVE TO WIN!

ABOUT THE TEACHER:

Carl Bell is a know-how weed scientist that has worked with owners/land managers all over Southern California in his role as UC Davis's extension/regional advisor on Weeds AKA Invasive Plants for 14 years. He is referred to as the Lead Expert on weeds. Carl Bell is a researcher (published on our own Barnet Ranch Preserve), an educator, and an advocate of sound natural resource policy related to invasive plants' impacts on natural habitats. Currently, Carl Bell, MS in Botany carries out his life work through his business called SoCal Invasives, and by volunteering for several organizations like the California Weed Society and providing community education—like this talk.

7pm Ramona Community Center

434 Aqua Lane, 92065

Free!

HOW TO: reduce weeding and herbicides on your private property and community- wide, reduce fires and floods, protect native plant species and the animals that depend on those species, work together to reduce open space management costs for our beautiful preserves and the future Santa Maria Creek Greenway, reduce vet bills and protect your animals from those pesky, toxic invasives.

**HOSTED BY IRON MOUNTAIN CONSERVANCY AND
FRIENDS OF SANTA MARIA CREEK GREENWAY**
